

- Enhanced Lawn Fertilization Programs
 - Environmentally Responsible
- Best of Science and Mother Nature!

Our programs offer...

- ✦ Healthier plants & a healthier lawn
- ✦ Low rates and applications
- ✦ Less fertilizer/less pesticide/less watering
- ✦ Safer, better, greener lawn care while caring for plant and soil health
- ✦ Better nutrient uptake
- ✦ Better color response
- ✦ Better plant resilience

Choose from two types of programs:

Standard Lawn Care Program

Smart Scapes' standard lawn care program uses granular fertilizers and liquid weed control. In addition to controlling common broadleaf weeds like dandelions, we can also take care of more complicated grassy weeds such as nutsedge and crabgrass. We offer Basic, Deluxe and Premium plans so you can choose the level of service that's right for you. Our core "Make Your Neighbors Jealous Lawn Care Program"™ remains as one of our most popular programs and includes both our Premium Lawn Care as well as Mowing service.

What is Holganix? Holganix is a 100% organic, plant probiotic and bio-nutritional product that allows us to utilize up to 50% less chemical fertilizers and 75% less pesticides than our traditional program. We are excited to include probiotic-filled Holganix (like yogurt for your lawn) as the base application. Holganix will restore your soil's micro-organism level back to the way Mother Nature intended, providing optimum conditions to grow strong, healthy grass with up to 75% less synthetic inputs, which is great news for your family, pets and local water ways. Good for the planet, Holganix is a non-poisonous, food grade product. It's safe for water in our community and nearly eliminates the need for nitrates, phosphates and pesticide products.

No matter which program you choose, rest assured, this will give you all the results you're seeking, with healthy low application rates, while giving us the ability to add microbial organic amendments to your soil. Remember, by choosing Smart Scapes, you are promoting sustainable practices in our local community.

Organolawn™ Program

Smart Scapes is proud to announce that we are now also offering an organic approach to lawn care. Our Organolawn™ program is a Holganix Hybrid Lawn Care Program that uses a probiotic approach to nourish your landscape, giving you the best of science and Mother Nature! This program will combine the use of organic materials with traditional weed control. It is a healthy grow program with pro-biotics that will bring "Life" back to the soil. It is available in our Basic, Deluxe, and Premium plans as well as the "Make Your Neighbors Jealous Lawn Care Program"™

We put the CARE into lawn care!™
